

Pasture Principles

A practical guide to pasture management

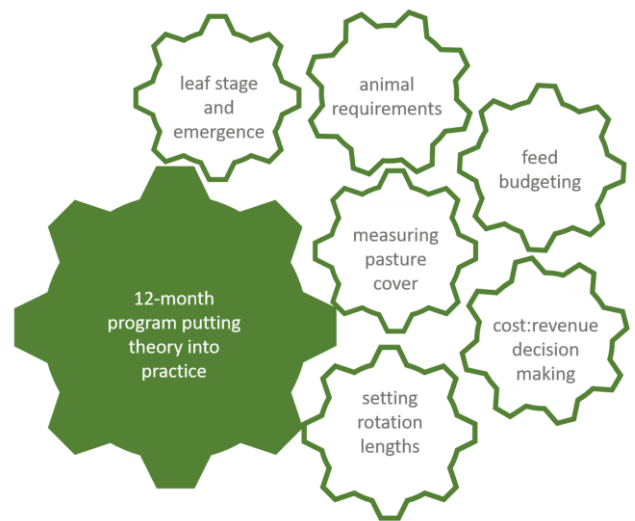

A 12-month program designed to build livestock producer's skills in pasture management, being delivered in South Australia, Victoria, New South Wales and Tasmania in 2021

Pasture management is the fundamental skill that determines the profitability of pasture based grazing systems as the key driver of stocking rate.

Pasture Principles developed by Pinion Advisory, provides a group training environment for farmers to learn the guiding principles of pasture management that will allow them to work confidently regardless of the season or system.

The program is suitable for producers involved in the sheep, beef and dairy industries.

Pasture Principles is a 7-day program including theory and on-farm coaching sessions delivered within a 12-month period, with sessions aligned with key seasonal pasture management timeframes.

"Our entire team undertook the Pasture Principles program. From this we implemented a new grazing management plan, only possible with the new skills we obtained from Pasture Principles. Pasture Principles provided us with one of the most critical turning points in our business productivity and profitability in the last decade." *Frank Archer, Landfall Angus.*

Want to participate in Pasture Principles?

Delivery locations will be determined based on interest. The commercial cost for this course is \$2500 ex GST per farm business. However, with the support of MLA's Profitable Grazing Systems program, this course is discounted for producers.
