

COACHING

Effective, proactive and committed advice to help advance your business

FEATURES

We can tailor our coaching service according to your needs. We can either meet regularly, or offer a once off consultation. Our typical approach to coaching involves a pre-meeting discussion with you to determine your needs and ensure expectations are outlined. This is followed by a series of coaching sessions to work through key issues and provide responsive business management advice. The most effective way to create change within your business is to hold regular sessions, either monthly or bi-monthly.

Your business can be coached in the following specialist areas:

- Business planning
- Leasing and share farming
- Market development
- Feasibility studies
- Strategic planning
- Human resource planning
- Succession planning
- Or, we can also provide coaching in general business management and personal development.

COACHING

We will also provide you with:

- The notes and actions taken during your sessions
- Telephone and email coaching and support
- The use of our boardrooms and meeting facilities

This service is best used by purchasing a block of time (eg. 10-12 hours), and then using this allocation throughout the year.
