QUALIFICATIONS

- Cert IV in Civil Construction and Design

As an Engineering Technical Officer for Lower Murray Water, Mat developed an excellent understanding of both rural and urban water systems. In addition to survey, design and drafting tasks, he was responsible for the management of major works including mains replacements, sewerage upgrades and subdivision reticulations.

Beyond his experience in design and drafting, Mat has undertaken GPS set-out and construction surveys and prepared drawings from a broad range of survey types. He is adept in the use of specialist software systems, with more than 15 years' experience using AutoCAD, Civil 3D in addition to GPS and GPR systems.

Mat provides support to Pinion Advisory's national team of project staff across both irrigation and water engineering projects and holds a current white card. His extensive range of industry knowledge is an excellent contribution to our team.

- Irrigation design – commercial, landscape, turf and horticulture
- Experience in pipe design of urban water, wastewater, irrigation water and irrigation drainage systems
- 15+ years drafting with AutoCAD 2D, Civil 3D Pipe Longsections and 3D Modelling
- Surveying GPS & Total Station and set-out

Professional experience

- Pinion Advisory (HydroPlan) – Irrigation Design Drafter – 2021-present
- Lower Murray Water – Engineering Technical Officer
