QUALIFICATIONS

- Master of Animal Sciences
- Bachelor of Animal Sciences
- Cert IV Workplace Health and Safety

Esmée de Looff is an Agribusiness Consultant in Pinion Advisory's Food and Ag Production team.

Esmée is passionate about driving resource efficiency in livestock production systems. She enjoys supporting producers to use farm data for more informed decision making. Esmée has experience facilitating groups and helping producers to expand on their knowledge and learn new skills. She has an interest in research and development and enjoys being involved with extension to help producers find effective ways to optimise their productivity and profitability in a sustainable manner.

Esmée has a qualification in Workplace Health and Safety and is committed to supporting producers in managing safety on farm in a practical yet compliant manner.

Areas of expertise
